

Roveya™

CORPORATE BROCHURE · 2027

Every site. Every shift. One connected record.

Operations software for field-based businesses, built inside a live UK construction, security and facilities operation.

roveya.io

Too many tools. Too little control.

Most field-based businesses run on a patchwork: job sheets in one place, RAMS on paper, photos in WhatsApp groups, timesheets in spreadsheets and invoices somewhere else again. Every hand-off loses something, and the office spends its week chasing what the field already knows.

Roveya replaces the patchwork with one operational record. The work, the people, the evidence, the compliance and the money all live in the same place, so everyone works from the same truth.

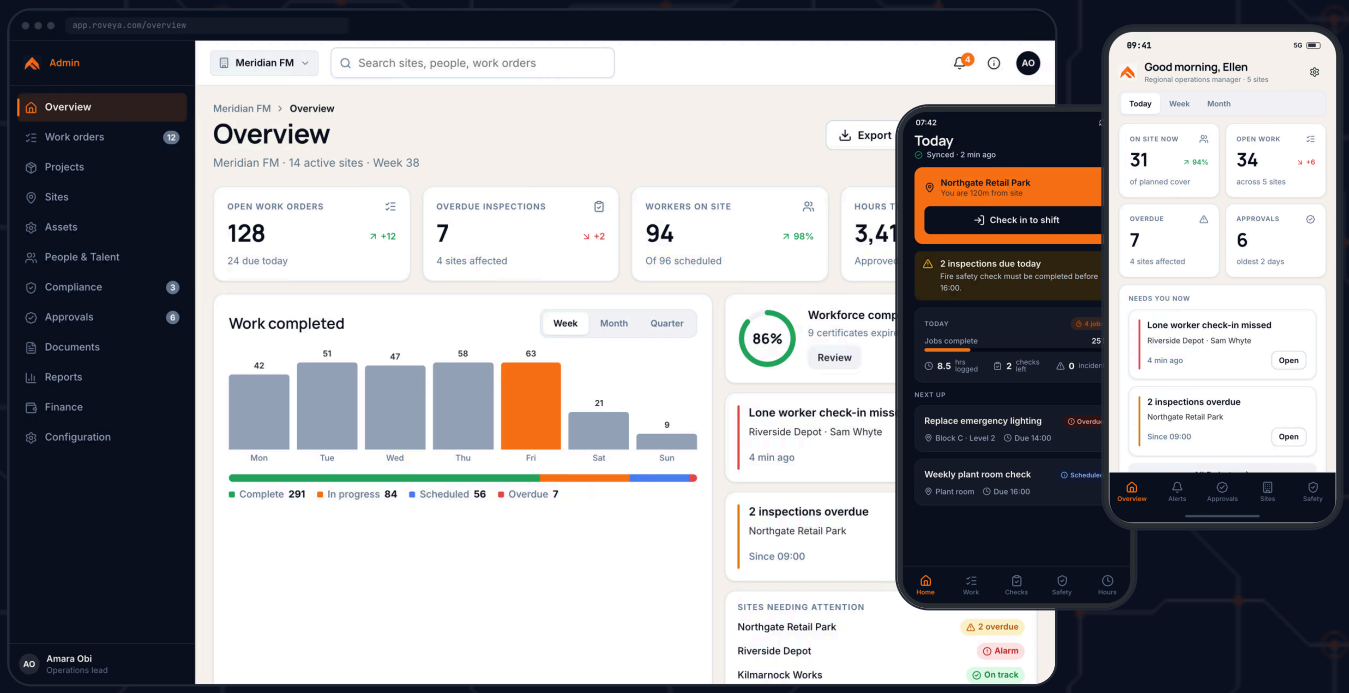
- ~~Paper job sheets~~
- ~~WhatsApp photo threads~~
- ~~Paper RAMS and sign-off sheets~~
- ~~Spreadsheet timesheets~~
- ~~Separate invoicing and CIS workings~~
- ~~Certificate expiry reminders in someone's head~~

✓ **One operational record**

JimPatrick Munupe, Founder

Close to 20 years in construction and facilities management, trained as a building surveyor, and the operator behind Ascent Onsite Group. Roveya was built to fix the risks he saw on site every day.

One platform. Three ways to work.



ROVEYA ADMIN

The back office on the web: projects, planning, people, compliance, finance and reporting.

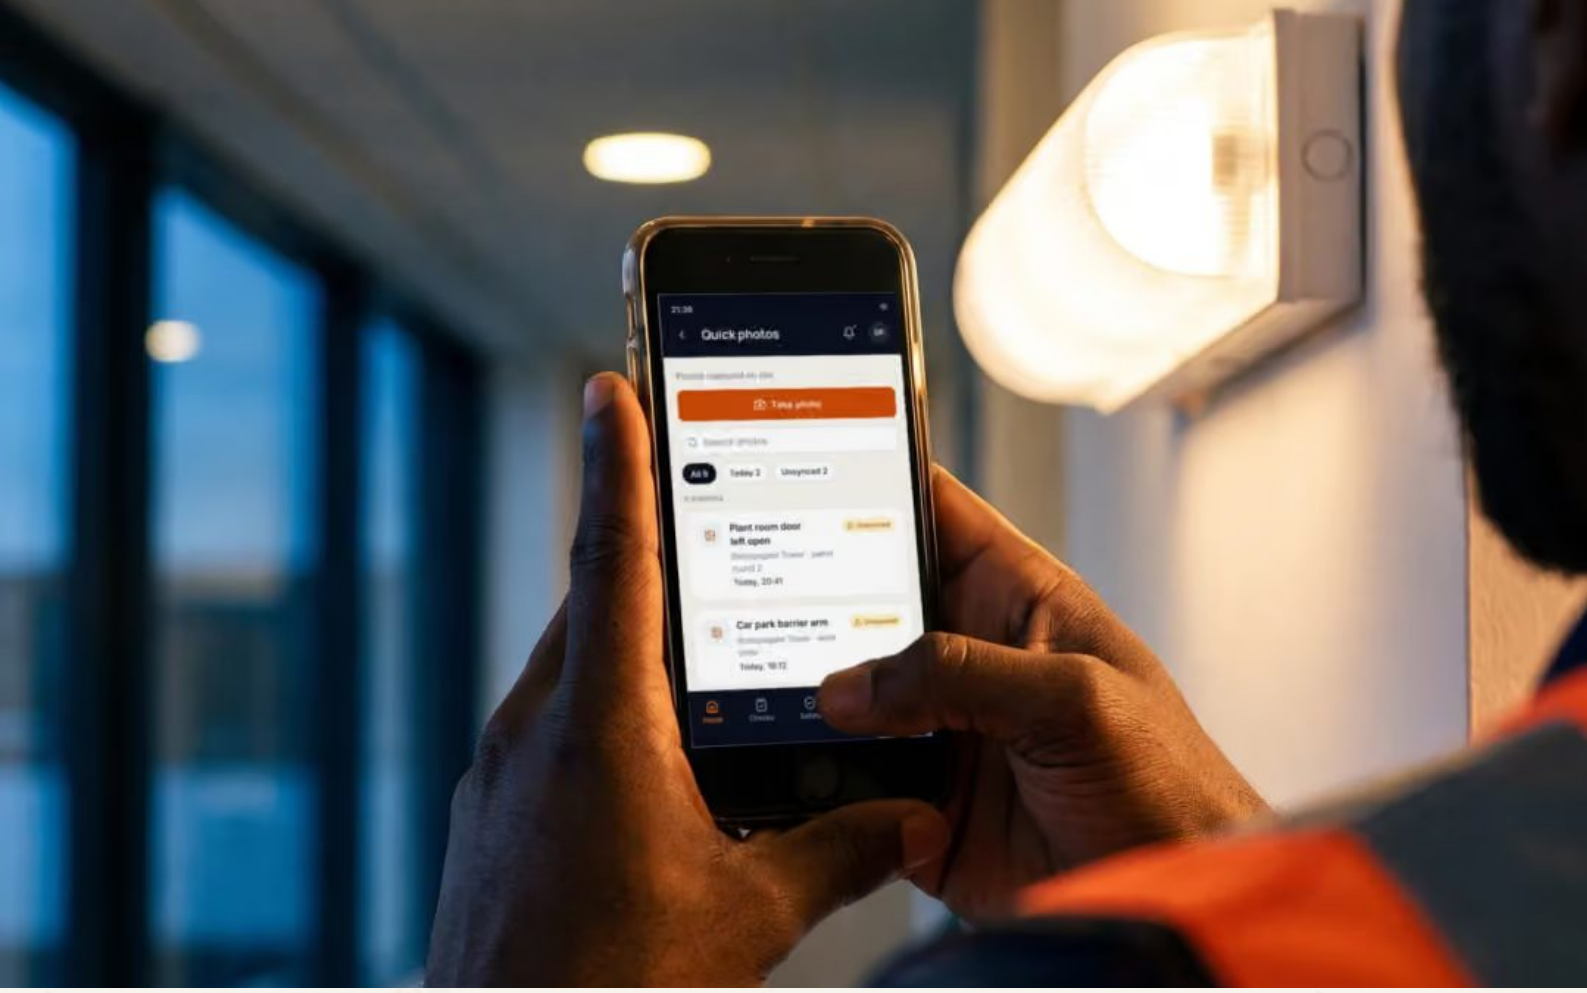
ROVEYA OPS

The field app: today's work, inspections, photo evidence, RAMS sign-off and lone-worker safety, with or without signal.

ROVEYA HUB

The manager's app: approvals, alerts and exceptions across every site, without being tied to a desk.

All three work from the same record. Nothing is re-keyed, so the office sees what the field did the moment it syncs.

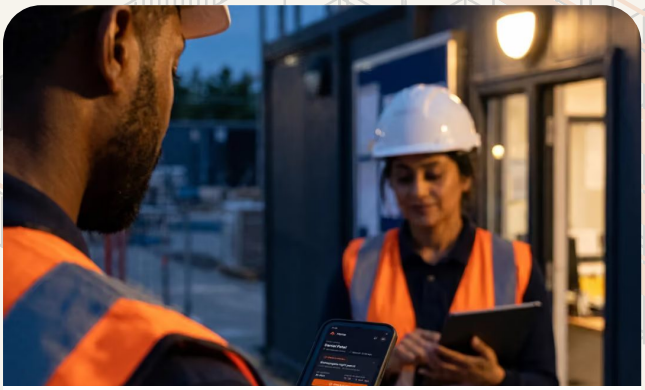


03 · IN THE FIELD

Capture it once, where the work happens.

- **Work orders and planner.** Jobs scheduled on a calendar and team timeline, sent straight to the right phone.
- **Inspections and evidence.** Checklists, photos, notes and signatures attached to the job they prove.
- **Works without signal.** Basements, plant rooms and remote sites: work saves on the device and syncs itself later.
- **Lone-worker safety.** Check-ins and SOS alerts that reach a manager, with location.
- **Issues that stay attached.** A problem found on site is raised, assigned and closed against the work it affects.

Prove compliance. Get paid for the work.



Compliance & RAMS

- Build RAMS with hazard libraries, COSHH and method statements
- Issue to named people and see who has read and signed which version
- Certificates and accreditations tracked, with reminders before they lapse
- An audit history of who did what, when

Finance & applications for payment

- Quotes, invoices and applications for payment from the same record as the work
- CIS deductions and domestic reverse charge VAT built in
- Credit notes, payment reversals and your own numbering
- Valuations backed by the evidence captured on site

All-inclusive. RAMS, CIS and applications for payment are part of Roveya Professional, not add-ons bolted on later.

05 · BUILT FOR YOUR SECTOR

CUSTOMER ZERO

06 · BUILT INSIDE A LIVE OPERATION

Used before it was marketed.

Roveya was built and proven inside Ascent Onsite Group (AOG), a UK construction, security and facilities business. AOG is customer zero: its teams ran their sites, people and paperwork on Roveya before anyone else could buy it.

3
apps on one record

0
bars of signal needed in the field

1
place for work, compliance and money

From first demo to go-live, with you all the way.

1

Demo

A 40-minute working session around your sites and workflows. No slides.

2

Evaluate

A free 14-day sandbox preloaded with sample data, for your team to try.

3

Onboard

We set Roveya up for you: sites, people, templates, finance and training.

4

Go live

Hands-on support through go-live, then a team that knows your operation.

Security and trust, by design

- Each organisation's data separated as its own tenant
- Access follows the role, project and site
- Key actions recorded and attributable
- Your data exportable as CSV and XLSX
- AI assists; a person always decides
- Handled under UK GDPR, with a data processing agreement

Security & Trust →

Priced for the whole team.

Office seats for the people who run the operation. Low-cost field seats for everyone on site.

ESSENTIALS

Get field work under control
